## Neden yavaşlatıcı kullanılmalı?

### Daha az gürültü

Yavaşlatma mekanizmalı kayar kapı ve kapaklar, yüksek konsantrasyon gerektiren mekanlarda istenmeyen sesleri önler ve gürültüsüz bir ortam sağlar.

## Why soft closer should be used?

### Less Noise

Sliding doors and covers with soft closer mechanisms prevent unwanted sounds and provide a noiseless environment in places that require high concentration.

### Yüksek güvenlik

Yavaşlatma mekanizması, özellikle küçük çocukların, yaşlı ya da engellilerin olduğu ortamlarda parmakların kapı ve duvar veya kapak ve yan panel arasına sıkışma riskini engeller. Otomatik frenleme sistemi ve yavaş kapanma özelliği kapının veya kapağın çarparak kapanmasını engellediği için yüksek güvenlik sağlar.

### High Security

The Soft closer mechanism prevents the risk of fingers being caught between the door and the wall or the door and the side panel, especially in the presence of small children, the elderly or the disabled. The automatic braking system and slow closing feature provide high security as it prevents the door or cover from slamming shut.

### Düşük maliyet, yüksek verim

Albatur yavaşlatıcı sistemleri, özellikle farklı tipte kayar kapı ve kapaklar için tasarlanmış ve uygulanmış ürünlerdir. Farklı kapı ve kayar kapı tiplerinin bir çoğu vidalanarak kolayca takılabilen Albatur yavaşlatma sistemleri ile yüksek maliyet gerektirmeden donatılabilir.

### Low cost, maximum efficiency

Albatur soft closer systems are designed and applied especially different types of sliding doors and covers. Most of the different door and sliding door types can be equipped with Albatur soft closer systems that can be easily screwed and without requiring high cost.

### Malzeme dostu

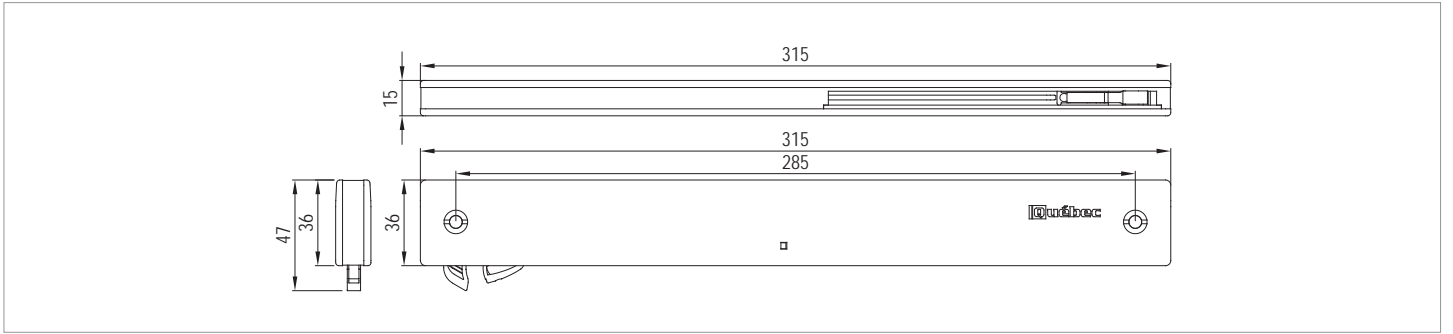

Sürgülü kapı ve kapakların sertçe kapanması, mekanizmanın işlemlerini sağlayan makaraların, rayların, kapı ve kapak kanatlarının, profillerin, kasa ve pervazların aşırı yıpranmasına neden olur. Yavaşlatma mekanizması kayar kapı ve kapakların kasaya çarparak yıpranmasını önleyerek uzun yıllar güvenle kullanılmasını sağlar.

### Material friendly

Fast closing of sliding doors and covers causes excessive wear of rollers, rails, door and cover wings, profiles, casing and moldings that enable the mechanism to work. The soft closing mechanism prevents the sliding doors and covers from being worn out by hitting the case, and ensures that they can be used safely for many years.

## Softline 6710

100 KG YAVAŞLATICI SİSTEM • 100 KG SOFT CLOSER SYSTEM

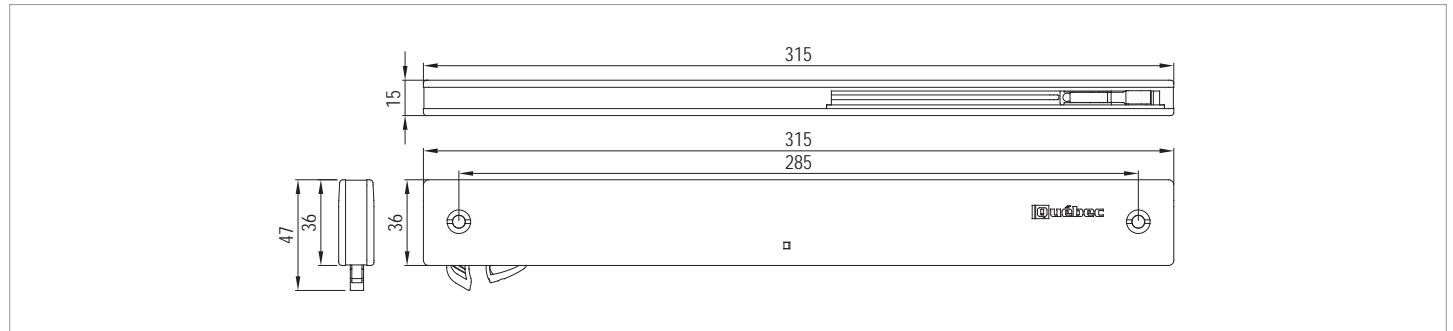

Kod / Code No	Açıklama / Description	Renk / Colour	Birim / Unit		
117-6710-1610	100 Kg Yavaşlatıcı Sistem / 100 Kg Soft Closer	Gri / Grey	1 Takım / 1 Kit	20	480
